Abstract

One or two sentences providing a **basic introduction** to the field, comprehensible to a scientist in any discipline.

Two to three sentences of **more detailed background**, comprehensible to scientists in related disciplines.

One sentence clearly stating the **general problem** being addressed by this particular study.

One sentence summarizing the main result (with the words “**here we show**” or their equivalent).

Two or three sentences explaining what the **main result** reveals in direct comparison to what was thought to be the case previously, or how the main result adds to previous knowledge.

One or two sentences to put the results into a more **general context**.

Two or three sentences to provide a **broader perspective**, readily comprehensible to a scientist in any discipline.

The title

Methods

We report how we determined our sample size, all data exclusions (if any), all manipulations, and all measures in the study.

Participants

Material

Procedure

Data analysis

We used R (Version 4.2.0; R Core Team, 2022) and the R-packages *kableExtra* (Version 1.3.4; Zhu, 2021), *knitr* (Version 1.39; Xie, 2015), *papaJa* (Version 0.1.0.9999; Aust & Barth, 2020), and *tinylab* (Version 0.2.3; Barth, 2022) for all our analyses.

Results

Analiza contingenței în funcție de rangul localității

În privința *actelor normative care reglementează organizarea și funcționarea autorității sau instituției publice* rezultă diferențe statistic semnificative ($\chi^2(2)=16.10$, $p=0.00$) determinate de rangul unității administrativ teritoriale. Într-adevăr, se pare că actele normative de acest tip par a nu exista mai curând la nivelul **comunelor** (16.09% „Nu” față de 17.24% „Da”) în comparație cu orașele (4.60% „Nu” față de 28.74% „Da”) și municipiile (2.30% „Nu” față de 31.03% „Da”), doar între comune și celelalte două categorii de unități administrative existând diferențe statistic semnificative (vezi figurile 1 și 2).

Din punct de vedere al *structurii organizatorice, atribuțiilor departamentelor, programul de funcționare, programul de audiențe al autorității sau instituției publice* nu apar diferențe statistic semnificative ($\chi^2(2)=0.28$, $p=0.87$) determinate de rangul unității administrativ

55 teritoriale. La toate aceste unități predomină evaluările pozitive (Comune: 29.89%, Orașe:
56 31.03%, Municipii: 29.89%) în favoarea celor negative (Comune: 3.45%, Orașe: 2.30%,
57 Municipii: 3.45%)
